

## Planets

### An introduction

**A planet is a celestial body orbiting a source of greater mass, such as a Star, Black Hole, Neutron Star etc...**

**They vary in size and style – and incorporating these differences into artwork can be tricky. These tutorials will take you through the basics of creating planets in respect to lighting, style (rocky/gas giants) and even close-up planets.**

["Beyond the Eclipse"](#) ~ Drydareelin

**Every planet, moon and ring texture will be available in the stock's folder.**

**Starting websites:**

**Paint.Net Homepage:** <http://www.getpaint.net/>

**The Paint.Net Forums:** <http://forums.getpaint.net/>

**Get Plugins:** <http://forums.getpaint.net/index.php?/topic/15260-plugin-index/>

**Pdn fans:** <http://pdnfans.proboards.com/index.cgi>

**How-to install Plugins:** <http://forums.getpaint.net/index.php?/topic/1708-how-to-install-pluginsgeneral-plugin-troubleshooting-thread/>

**Take note of the “Get Plugins” website, you’ll be visiting that a lot.**

**I hope you enjoy these tutorials,**

**Daniel**
